

Electric forklift

B-X series

60/70/80/90B-X, 80B-XL

Next-Generation Electric Power, A New Level of Innovation

THE NEXT GENERATION

B-X

Powerful Performance, Electric Innovation

Equipped with high-performance batteries that deliver output equivalent to ICE* forklift trucks, these electric models ensure efficient operation in both indoor and outdoor environments.

Rugged Durability Meets Comfortable Operation

By incorporating core components such as the cabin and tire used in ICE powered forklifts, this series maintains durability while providing a low-noise, low-vibration design for a cleaner and more pleasant working environment, indoors and out.

Fast Charging, High Efficiency

Delivers exceptional work efficiency with up to 12 hours of operation on a single charge.
(Based on the 93kWh battery option for the 70B-X model.)

Proven Battery Safety and Long-Lasting Durability

Batteries are UL and CE* certified to ensure operational safety and are rated IP67 for water resistance, making them suitable for outdoor use under various conditions.

Hi-Care Service

Feel confident with the Hi-Care service from Hyundai Material Handling — rapid maintenance support from certified Hyundai industrial vehicle engineers along with customised safety training tailored to your needs.

Eco-Friendly Operation

No harmful gas emissions during use to ensure clean workplaces while contributing to ESG goals and carbon neutral operation.

* ICE: internal combustion engine, UL: North American certification (Underwriters Laboratories), CE: European certification (Conformité Européenne)

ENERGY & PERFORMANCE

Experience the ultimate performance with the Hyundai Material Handling 60/70/80/90B-X Series. Delivering powerful capability and outstanding work efficiency on par with ICE forklifts, this series ensures top-tier performance in any work environment.

Performance Equal to
ICE Powered Models

Delivers outstanding operational performance in any environment
with output equivalent to that of ICE powered forklifts.

Usable and storable outdoors even in wet weather

IP67

Water & dust protection ratings for
major components

IP69K

Battery pack / Drive motor / Hydraulic motor /
Power distribution unit / Battery thermal management system

VCU (Vehicle control unit)

**Fast Charging, Long Usage
Charging Solutions for Enhanced
Productivity and Stability**

A charging solution that enhances productivity and stability.
Up to 12 hours of operation with around 2 hours of charging.
This maximises field efficiency by minimising work interruption.
(Based on 93kWh battery/charger configuration)

Standard lithium battery included

Comes equipped with high-performance lithium batteries for extended runtime and fast charging, improving work convenience and efficiency.

Battery heating & Cooling system

Maintains optimal battery temperature regardless of external conditions, ensuring stable performance even in extremely hot or cold environments.

Battery fire suppression system

Real-time battery monitoring detects abnormal signals and controls charging/discharging, while activating automatic fire suppression systems as needed to ensure safety.

On-demand system

The hydraulic motor operates optimally on lever inputs, delivering a quieter performance compared to ICE models and productive and economical working.

Charging solution & Battery runtime information

* Based on 93kWh battery option.
* Battery charging time and runtime may vary depending on operational conditions.

Large heated side mirrors

Heated mirrors give wide rear visibility for safe operation even in poor weather.

4.3" LCD cluster

Displays battery level, temperature and warning lights, and allows mode and feature adjustments.

12V socket & USB charger

Convenient power supply for accessories inside the cabin.

Air suspension & Swivel seat

Enhances comfort with shock absorption while giving easy access.

Constant heating & Cooling

Provides maximum climate control performance regardless of coolant temperature.

Dual brake pedals

Allows two-foot operation, familiar to ICE drivers.

CONVENIENCE

Ergonomic design with a range of driver-focused features creates the optimal environment for comfortable and efficient working.

Various Driver Convenience Features for Easier Operation

Creep mode (Optional)

Smooth low-speed movement without using the accelerator pedal while allowing fine movement and reducing operator fatigue

Allows travel at 2.5 km/h without pressing the accelerator

Auto hold / Auto parking

These functions enhance safety by automatically applying the parking brake when the forklift is stationary or the driver dismounts.

Auto hold: Automatically engages the parking brake when the brake pedal is held for more than 4 seconds.
Auto parking: Automatically engages the parking brake when the operator leaves the seat.

Anti-rollback

Even on slopes, the system gently controls speed to prevent the forklift from rolling back, helping ensure safe stopping and restarting.

Always park on level ground when using this function for safety.

Drive mode selection

Operators can choose the most suitable driving mode depending on their preferences and working environment.

N (Normal) : Same acceleration feel as ICE forklifts
H (High) : Implement instant acceleration performance for fast task processing
E (Economic) : Smooth acceleration performance with energy efficiency

SAFETY

Along with great reliability, advanced safety systems help prevent accidents even in unexpected situations to create a safer industrial working environment.

Blue spot & Red zone (Optional)

Blue spot projects a blue light in front of the forklift, warning pedestrians ahead of approaching equipment. **Red zone** creates a visual safety boundary around the forklift using red lighting to help prevent accidents and protect everyone in the workplace.

Pedestrian detection system (Optional)

A smart safety-assist system is designed to prevent collisions between pedestrians and forklifts. When the camera detects a person nearby, the system highlights the surrounding area in yellow on the monitor, providing a clear visual warning to the operator.

MAINTENANCE

A design focused on easy servicing and economical maintenance allows for reliable long-term operation.

Superior Maintenance Accessibility

The cabin tilts up to 52 degrees, providing good access for maintenance. Key components such as the powertrain, hydraulic and electrical systems are easily accessible ensuring excellent serviceability. From routine inspections to parts replacement, maintenance is quick, efficient and minimises downtime.

High voltage cable safety design

Bright orange insulation makes high-voltage lines easy to identify, while excellent insulation performance and protection against overheating and external impact ensure safe operation.

Total cost of ownership (TCO) comparison : Next-gen electric model (B-X) vs. ICE powered model (D-9V)

Estimated savings at year 10: Approx. \$76,000

Water-cooled cooling system

The system efficiently cools the battery and key components to ensure peak performance and safety so stable operation is maintained even under heavy-duty working without degrading performance.

Accessory bar & storage space

A dedicated mounting bar to the right of the driver's seat and a built-in storage compartment below the cabin help create a personalised and efficient work environment.

EHPS system

Delivers precise steering and smooth handling, offering excellent maneuverability in tight spaces, reducing driver fatigue.

Extended fender (Optional)

Shields the operator and work environment from debris and contaminants kicked up from the front tires.

A Data-driven Solution for Field Management

With the all-new Hi MATE, you can manage forklift fleets at your logistics site. Visualised data supports the development of management plans for improving safety, boosting productivity, and reducing costs on-site.

Fleet-Level Equipment Operation Management

- Real-time monitoring and post-operation management support by fleet, vehicle, and operator
- Provides operation efficiency, utilisation trends, route tracking, fault alerts, and consumable status

Wireless Configuration and Software Update Support

- Remote configuration of key operational features and wireless software update capability
- Supported models are being expanded

Enhanced Smartphone App

- Fleet and vehicle-level monitoring, remote settings, and work instructions
- Compatible with Galaxy (Android) and iPhone devices

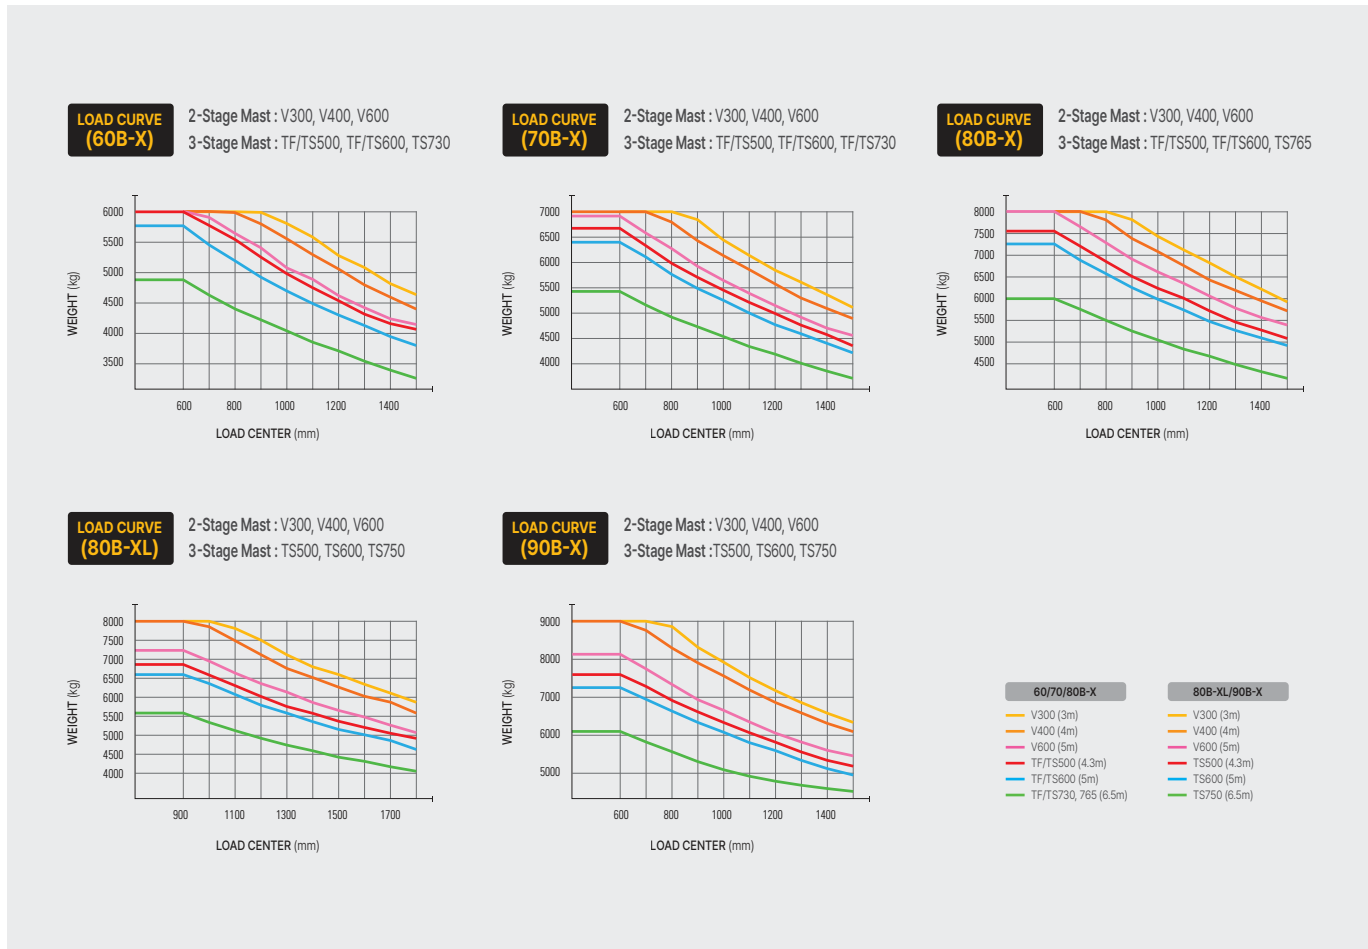

External Communication & Authentication Device Compatibility

- Compatible with third-party communication terminals and operator authentication devices
- Supports basic features such as operation data management
